Profile

With over 2 years of experience, I have advanced in developing practice projects. I have the ability to solve problems, develop dynamic and responsive designs in team and individual projects. I am interested in innovation and learning programming trends and am always looking for new ways to improve website performance.

Projects

► Giah Land

2025/03/11 - 2025/03/29

Flower and plant store project, Ghea Land. Developed with React Fully responsive With optimized and unique UI/UX With dedicated backend with Next.js In this internship project, as a front-end developer, I am responsible for implementing the appearance and logic of this project from scratch.

Giah-land.vercel.app

► Fit Land

2025/04/19 - 2025/05/10

Fitland is a fully responsive sports equipment store website that includes multiple components and pages. The user side of this project is developed with Typescript + React (tsx) and the server side of the project is developed with Next.js. In this project, I am responsible for developing the appearance and logic from 0 to 100.

► Portfolio

2025/07/27 - 2025/08/05

The Portfolio project is a personal project to showcase my work and abilities. This project has minimal and user-friendly animations that have made the site beautiful and transformed it from a dry and faceless site to a modern one.
